

Systematic Approach

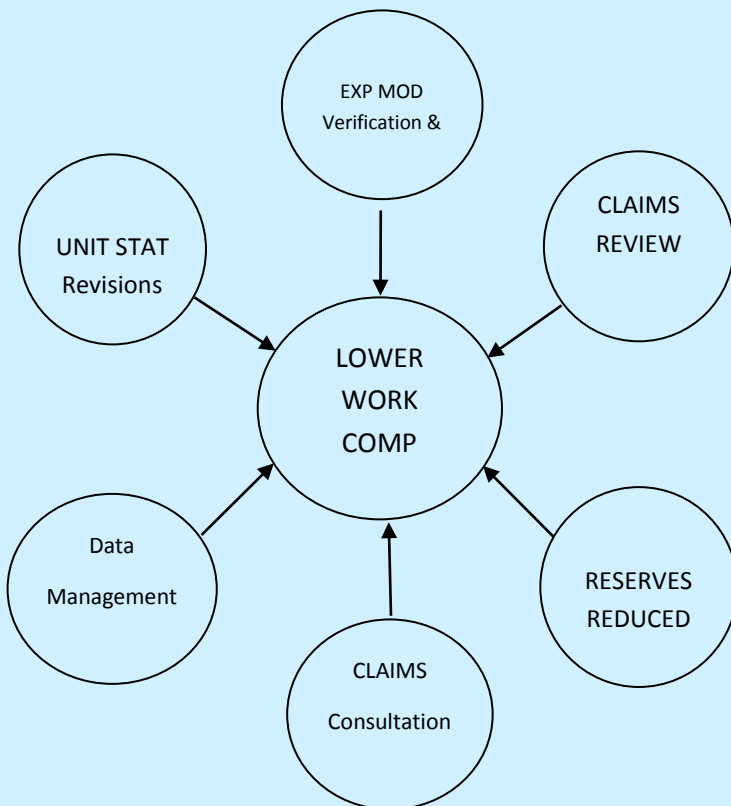

Workers' Compensation is getting more complicated every day.

Often claims adjusters have overwhelming number of claims to process and as a result take an exceedingly long time to settle pending Work Comp files. Reserves are set high for ultimate settlement as opposed to what current claim information supports at any given time, and consequently they are often overstated for unit statistical plan filing purposes.

Strahan Insurance Services Inc. can help at No Additional Cost to You

One of our core value added services is access to the nation's premier workers' compensation cost control system. They have a documented history of auditing workers' compensation files, reducing open reserves by 30% and lowering experience modifiers by 27 points. Ultimately, this decreases your premium costs.

We provide your company:

- Claim reviews prior to Unit Statistical Plan and Policy Renewal
- Claims Consultation regarding settlement and litigation
- Data Collection and Management; ordering loss runs on all accounts twice a year
- Data Processing of all loss runs from various carriers so reports are uniform
- Mod Verifications, Projections, and math models
- Premium Diagnostic Analysis Reports available for prospective clients
- Corrections submitted on any account in which we find errors
- Variety of reports, including but not limited to:
 - * Actual Liability Avoided
 - * Claims Under Audit
 - * Claims Status Reports
